AN UNTOLD SPEECH…

Past

I told you, "I just could not do it…"

"It is not about sympathy; I told you that; It is an apology…"

As I stood in front of my LD2 ready to give my nomination speech for LD2 Senator, I could not talk. I looked at the group of about 103 blank faces, then looked down at a "blank" piece of paper.

Oh, there was printing there, but no words of mine. No voice spoke to me. After looking up and saw a sign that said, **"STOP"**, I stopped and returned to my seat. Maybe that was a sign to just S-T-O-P.

What happened, was the real answer to my being there. I did not recognize but a small minority of the PC's present on Monday evening. There were people there that will never return again, unfortunately. There were people there whose faces were unrecognizable to me, as they were only called and asked to be there to vote because we needed a quorum.

A vote so important because one of three people would be nominated to represent these unrecognizable faces in the room; a face that had no interest in being there other than to pick only one person, as they did not know the rest. Most of the nominees were unrecognizable to them as well.

I continued for three minutes to look at the crowd, fumbling with the microphone and said, I think, "This is my 3 Minute Warning…I am Linda Brickman; please vote for me."

Present

Here is my apology to my LD. I let you down when I should have stood tall. No excuses from me, or sympathy for me. I could not be something, or say something, that is not me.

How could I possibly give a speech to folks I do not know, and lie to them by saying, "I came here tonight to ask for your vote, so I could represent you as your Senator." **A lie in the first line of a speech? Now that is rich, isn't it?**

One gentleman had said to me earlier on the phone, "Are you an America First candidate?"

"Yes!" I responded.

"That is not good! Trump is an A—H---. You do know he was the cause of J6!"

Sorry, My Patriots – I cannot and will not represent someone like that!

My apology goes to the minority of people, who did vote for ME, and for the values we both hold so true. I let you down.

What we need in government is something that has been lost and will not be found in our local district level. Stop searching from the top down, and look from the bottom up to find the answer. A search for hope and prayer within.

Values that extend to the true Constitutional Conservatives, the real America First patriots.

Words that should express the values of a parent whose voices ring loud saying we want choices back in the schoolroom. No indoctrination of our children by LGBTQ+ freaks, but an education of basic Reading, wRiting and aRithmatic. Maybe even a little CIVICS would be nice too.

Voices asking for truth, transparency and integrity, not just in elections, but across the government.

Babies who can be born without the fear of being killed before they echo their first sounds and feel the hand of a parent.

Soldiers who can come back to a Nation of prayer where they gave their limbs and life to those who care about freedom, and not be criticized and ridiculed for wearing a hat or shirt of a flag or pledging to the same.

Future

Instead of looking for a single beacon on a hill, look for the row of beacons marking a pathway for all to follow.

As Thomas Jefferson said, “We in America do not have government by the majority – we have government by the majority *who participate*… All tyranny needs to gain a foothold is for people of good conscience to remain silent.”

There were only a minority of good people in that room on Monday night… the people of good conscience remained silent and we lost.

But did we…lose?

It is my belief that those who voted as I did, were the WINNERS; the ones who did not…were the losers.

God remains in control and always will. I carry two books with me as we all should: the U.S. Constitution and the Bible. That is all we need to survive.

I was born a biological girl with a XX chromosome and will stay true to God’s choice of my gender. The Bible preaches that as well.

The true Constitutional Conservatives will be gratified to have a seat at the table when people realize that our REPUBLIC has resurfaced, and a fake Democracy has failed.

We do NOT now and NEVER have had a Democracy. The Declaration of Independence and our beloved Constitution NEVER use the words Democrat or Democracy; but our Pledge of Allegiance does recite the words, "…to the Republic for which it stands." These words are spoken to the Flag with honor.

LET FREEDOM RING ONCE AGAIN!

We need to take remarkable action – not inaction. To gain freedom and regain our lost value system, we must guard our actions from our enemy, for they could violate our territory and establish a precedent securing their liberties first.

We will have the freedom and values we so richly deserve when we are in the harness. It is a climb up the mountain, but as we are ascending, the small actions we take and succeed at, will be the oxygen to our soul to give us the power to continue to fight.

Don't mistake freedom for liberty to do as you please, or values of a material nature of having what we want. While we're taking action for the freedom that we're working for, remember that there are Two Types of Freedom:

> The false, where a person is free to do what they like;
>
> The true, where that person is free to do what they ought.

Remember, once you have realized the freedom you seek and enjoy the labor of, we need to be careful as unfortunately, we often see our politicians start to accumulate new laws to take them away.

And when giving our children the values of a family unity with strong religious beliefs, don't forget the need of teaching them to honor God in their presence.

Once we have the freedom we so earnestly wanted, we will realize that when the chains around our ankle have been removed, and we will at last realize the other end was fastened about your own neck.

Freedom and values are nothing more but a chance to be better than we are now not be better than someone else. If we open our eyes and learn to be responsible to ourselves and others; if we understand that freedom does not come free or without error; when we learn to lift our own arms and place the bread in our own mouths and help others; when we resolve that we must go into the water to learn how to swim; we will then learn that freedom comes from strength and truth, and value comes from truth and integrity.

When a man or woman can come forward and lead us with a strong sense of values and turn America back to where it should be, then and only then will we understand the birth of freedom once again.

A United States that can stand proud on her soil and engage others to follow in the footsteps of a prosperous land of opportunities, a place where growth can excel and a Country abundant with jobs, is a Country where Freedom will Ring from every mountain top, to every fruited plain; from a new born baby's first smile to the last breath of a spirited and honorable soldier, this is our Country and God will Bless America!

P.S. For those who asked, below is a copy of my Original Speech.

MY THREE MINUTE WARNING!

Do you want the status quo doing the same things with the same people all the time in Government, or

Do you want new, clear, transparent communication with new blood and new ideas?

An LD2 Citizen Legislator Forum every week is where we should meet together in a townhall, zoom call, or where ever you want to discuss issues before they are brought to the legislature. Never before has that been done!

Your voices need to be heard and your interests served in the legislature!

Hear my voice before a vote is made; not afterwards tooting my own decision.

We will stand together, but only if I hear & see where you are standing. Walk with me as we begin a new journey together as America First, Constitutional Conservatives striving for a better AZ for stronger election reform with no machines & going back to paper ballots & precinct voting; solid State sovereignty with closed borders; stricter laws and penalties on drugs and human trafficking; bringing back the family unit with more parental choice for our children; & NO indoctrination of children through LGBTQUI+.

My name is and will always be Linda; NOT SENATOR. I love my hats, so to keep my feet on the ground and you First, my hat has to fit my head. I am equal to you. Not better.

I carry two books with me always as my strength: the Bible and the US Constitution. The first book has already been banned in Utah in

grade schools – the second book is threatened every day of our lives. This needs to STOP.

I am Linda Brickman, with a God-given XX chromosome asking for your vote for Senate in LD2.

My three minutes are up; game over; but overtime now lies with YOU.
