It's ALL About CHILDREN R US…

Illegal Border Crossings Today:

35,750 as of 2:49 PM MST
Those numbers represent almost 7 hours of invasion on our border in 1/3 of one day! The number increases every minute by4-7 people!

Are You Protecting Your Children

From Infectious Immigrant Diseases?

From the day our children are born, as parents, guardians, or caregivers for these kids, we have put a roof above their heads; food in their mouths, and the best medical attention, including many important vaccinations starting at 2-3 months[25, 26, 27] of age.

When our children reach school age, it is required by law[25, 26] that ALL children show proof of immunization to attend ANY[25, 26, 27] school.

While precautions are in place to help raise children with their best interests in mind, can someone explain why Arizona Governor Katie Hobbs, feels so motivated, since Title 42 has ended, to roll out the Red Carpet for "unvetted" illegal immigrants coming into Arizona with little or no ID, or ways to access their immunization and health records?[4]

Humanitarian Relief is Here, BUT...

The number of immigrants is expected to be an estimated 700,000 entering across the border – not including the "gotaways." With over 70,000 - 100,000 migrants[7] (FAIR daily statistics) entering each day, it will not take too long to surpass that number.[29] The Migration Policy Institute (MPI) estimates there were about 11 million unauthorized immigrants in the United States in 2019, accounting for 23 percent of the U.S. immigrant population. The unauthorized population was largely stable in size from 2007 to 2019. While more recent data are not yet available, the population has likely increased since

2019, due to the large number of border arrivals in recent years. Arizona had 273,000 in 2019 and that's expected to dramatically rise in the near future.[29]

According to FAIR, "Last Thursday, by a vote of 219 to 213, the House passed the *Secure the Border Act* of 2023,[9] a monumental achievement and an important step towards ending the Biden border crisis." Among key provisions, the *Secure the Border Act*:

> *Prevents unaccompanied alien children surges at the border in a humanitarian way, ensuring they are screened and processed expeditiously with family members and sent home;*

One of the goals of this Act, as well as all Border states, must be to end the exploitation of children, and take care of them "humanitarily".[7]

AT least, that is what Arizona Governor Katie Hobbs believes. Her idea of humanitarian approach is her 5-Point Preparedness Plan (https://azgovernor.gov/office-arizona-governor/news/2023/05/governor-hobbs-announces-arizonas-title-42-preparedness). Unfortunately, this helps the illegals, not the legal children and adults in AZ.

Anyway, what does that mean? To school, clothe, feed, medically be responsible for all the illegal children, whether they come into the US with parents or unattended? It seems that no matter what their situation is, the United States remains responsible for these children while they're here, and that affects all of us as parents as well as taxpayers, as there's only so much money available, especially at the State level.

Just look at Yuma's $26 Million in uncompensated hospital medical costs incurred for immigrants over the past 12-month period; providing medical care to over 300,000 people who've crossed the border: that's three times the population of Yuma!

AND there's *No End In Sight* to the daily flow of new immigrants being let in, 99% of whom have no valid claim for asylum as they freely admit they are purely economic migrants.

With just these few facts under your belt, how is this humanitarian? And how much longer can Arizona cities afford uncompensated medical costs, as well as the other costs to provide services to immigrants and their families?

The No ID or Other Immunization Records Scandal

Reports from conservative reporters confirm that the Biden Administration and the NGOs who are being paid to help process illegal immigrants into the country regardless of legitimate asylum claims, are instructing immigrants to throw away ALL FORMS OF IDENTIFICATION before they cross the border… that's because it makes it virtually impossible for Customs and Border Patrol to vet adults or minors!

That also means NO IMMUNIZATION RECORDS are available from any illegal child or adult illegally entering our country![14]

The above picture was taken from an article by Ben Bergquam just a few days ago. He states,[14]

> *"These are the IDs we **found on the border in Yuma, AZ**. Why would people drop their IDs you might ask? The answer is simple, so we don't know who they really are. The green IDs represent people that have been given authorization to stay and work in Mexico, which would disqualify them from seeking asylum in America. Many times people have criminal history's that they don't want us to know about, and other times they're bringing people that aren't family members and pretending that they are. Some that cross are terrorists. The bottom line is they've all been coached by leftist NGOs on how to game the system! It's called immigration, fraud, and for some stupid reason Biden and Mayorkas allow it!"*
> (Law & Border" Real America's Voice News @RealAmVoice AmericasVoice.news)

There are illegal children and adults being bussed into New York, being housed in school gyms with no verification of immunization records.[10,14] How can this possibly be safe when on the adjoining gymnasium walls, our children are attending classrooms in an educational institution? Believe it or not, "Refugees, unlike most other immigrant populations, are not required to have any vaccinations before arrival in the U.S. In addition, many vaccines have limited or no availability in some developing countries or in specific refugee settings."[10]

Acceptable vaccination documentation must come from a vaccination record, either a personal vaccination record or a copy of a medical chart with entries made by a physician or other appropriate medical personnel.[11] With the NGO's telling the illegals to get rid of all vaccination documents before entering the border, this is an easy out for the illegals.[14,] Unfortunately, there are many available exemptions for illegal children.

Most states do require K-12 grades to be vaccinated to enter school. But there are exceptions to every situation. *In Arizona, an illegal child can enter school without documentation of immunization if they have completed the exemption form*. Two exemptions are for moral or religious reason, or even if a parent/sponsor says the child has a medical aliment to be able to forego the immunization.[25, 26, 27]

So now we have a *humanitarian and safety crisis* with unvaccinated children and adults looming in our midst, closely integrated with our vaccinated children.

If No Vaccinations…What About Diseases?

Title 42 is MORE than COVID-19…

Title 42 was enacted as part of the Public Health Service Act of 1944, to protect our country from people who had recently been in a country where a communicable disease was present, by prohibiting their entry and authorizing their contagion-related expulsions; it also prevents unlawful entry to bypass health-screening measures.

We've been having an immigration related health crisis for at least two decades – see the articles at the end. But it was President Trump who employed Title 42 for COVID-19, although it clearly applies to a host of other infectious diseases.

Arizona, Texas, Georgia, Illinois and New York (50,000 alone in the past year from New York[1])[1, 2, 3, 4, 5, 6, 12, 13, 14, 5, 16, 17, 18, 19, 20, 21, 22, 23, 24,] have all shown a tremendous increase in contagious diseases all stemming from the illegal immigration.

Georgia:

Multiple HIV clusters were identified in metro Atlanta in 2021 and 2022 among men who are gay or bisexual and other men who have sex with men. Dr. David Philpott, EIS class of 2021 and lead author of the published study, presented findings during the 2023 EIS conference, citing language barriers, lack of access to primary care, and immigration-deportation concerns as barriers to Hispanic men seeking HIV treatment.[6]

Arizona:

From the lack of hospital rooms, to the overcrowding in school gyms to illegal stays in hotels and the lack of vaccination records coming across the border (being destroyed, left behind or collected by the NGO's), and not vaxxed migrants have contagious bacterial infections and diseases, such as polio and TB, being passed along to our legal citizens. Chickenpox[24] and measles[24] are two other infectious and contagious diseases on the rise.[5]

The migrants are crowding out Yuma's residents, competing for beds in the emergency room or forcing delays in elective surgery because doctors are needed to care for the migrants.[5]

"In FY 2018, the [Yuma] sector [of the Border Patrol] incurred more than $700,000 in medical care costs to cover 1,700 aliens who were apprehended and who had to be transported to the hospital. ... Other aliens show up sick, particularly children, some of whom are suffering from illnesses not generally seen in modern American society, including mumps, measles, and tuberculosis, as well as others with influenza, scabies, and other skin diseases. Plainly, the Border Patrol is not able to turn these individuals away without treatment."[17]

New York:

If our children stand next to someone with TB on a bus or subway, or sit next to them in school they will catch it or any of the above [measles, polio, mumps influenza] contagious diseases.[1]

Nationwide, at least 6,009 of the 8,300 people with TB in 2022 were foreign-born, according to the CDC.[1]

The polio virus spreads through person-to-person contact, lives in an infected person's throat and intestines — and can contaminate food and water in unsanitary conditions.[24] Paralysis is the most severe symptom of poliovirus because it can lead to permanent disability and death.[24]

TB, COVID-19, Chickenpox are highly contagious and s occurring among families who recently arrived and are residing in shelters and other facilities in NYC. Most cases have been among unvaccinated children, but cases have also occurred among young adults.[24] …the commissioner said because of the recent outbreak with migrants, chickenpox cases in shelters need to be reported to the Health Department Provider Access Line.[24]

Texas:

In a recent interview with the Tribune, state Rep. Leo Berman, R-Tyler, specifically said illegal immigrants are bringing in tuberculosis, malaria, polio, leprosy — even the plague. [23] Additional cases of malaria were reported in Texas, polio and the plague were also present in Texas.

Arizona, Texas:

"Concerns have been specifically raised about children, due to the risk of infections spreading in public schools. But the CDC currently believes that the children arriving at US borders "pose little risk of spreading infectious diseases to the general public. The CDC also confirms that vaccinations are provided to all children who do not have valid

documentation. All children are initially screened for visible and obvious health issues (for example, lice, rashes, diarrhea, and cough) when they first arrive at Customs and Border Protection facilities." "…Such conditions include drug addiction or communicable diseases of public health significance such as TB, syphilis, gonorrhea, leprosy, and a changing list of current threats such as polio, cholera, diphtheria, smallpox, or severe acute respiratory syndromes. Illegal immigrants crossing into the United States could bring any of these threats."[21]

All states:

- All children are initially screened for visible and obvious health issues (for example, lice, rashes, diarrhea, and cough) when they first arrive at Customs and Border Protection facilities." "…Such conditions include drug addiction or communicable diseases of public health significance such as TB, syphilis, gonorrhea, leprosy, and a changing list of current threats such as polio, cholera, diphtheria, smallpox, or severe acute respiratory syndromes. Illegal immigrants crossing into the United States could bring any of these threats."[21]
- Florida has a 21% increase in TB since 2020.[1]
- Texas border counties had a TB rate increase of triple the national average.[1]
- All of these cases originated in another country.[1]
- Polio spreads through sewage, feces, and from shaking unclean hands.[1]
- Polio is a paralytic disease, but most often an asymptomatic and Biden does not care.[1]
- An increase of Polio and TB have been shown on the border states already.[21]

That said, what assurances do we have from Hobbs or the FEDS that ALL illegal migrants, adults and children, family units and unaccompanied children, are undergoing comprehensive health-screening measures for infectious diseases, as well as meeting the same vaccination schedules required under Arizona Law BEFORE they are allowed to be in contact with Arizona citizens and residents?

Here is Our 6 Point Crisis:

1. This is out and out FRAUD.

2. No vetting of illegals – children or adults carrying diseases with no proof of vaccinations.
3. NGO's are helping the illegals following Biden's Orders.
4. This is medically, morally and religiously unsafe. No Humanitarian standards.
5. Our Constitution is being used against the legal citizens of this Nation and for the benefit of the illegals.
6. A Democracy/Republic is characterized by a majority rule; The NGO's and illegals are characterized by a Mob Rule. This isn't even a Democratic Principle!

Our Call to Action – Solution – YOU DECIDE… Check All or…

- Close the Border.
- Properly vet all illegals with all necessary ID BEFORE entering our country, or return to your country and do not enter until all ID is acquired.
- Illegals/sponsors cannot attend educational facilities, hotels, or medical institutions without legal, accurate, and complete medical documentation (including all necessary vaccinations), an up-to-date passport and full Identification.
- Pass Arizona legislation as Florida and Texas have done/are doing to protect legal Arizonans. Immediately convene Ad Hoc Committee Hearings and Floor Sessions at the AZ Legislature to discuss ways of getting legislation passed or Resolutions made to stop the influx of illegals across our Southern borders.
- Get assurances from both the Arizona House and Arizona Senate leadership that they will not go "Sine Die" so they can respond to any Immigration Health Related Crisis that arises.
